OT ACCESS VENDOR CAPABILITY MAP

21 capabilities × 11 vendors, grouped by the customer types they matter to. Coverage = total score ÷ maximum possible. It measures breadth, not quality, price or fit for your site.

3 Full support · 2 Partial · 1 Limited or via partner · 0 Not found in public sources

CAPABILITY ↓ / VENDOR →	Fortinet	Xertified XoT	Claroty	Cyolo	Secomea	Siemens SINEMA RC	Xona	Tosibox	IXON	BeyondTrust	Ewon (HMS)

SIEM integration	3	2	3	2	2	2	2	1	1	3	1

WHAT STANDS OUT

- Remote-access specialists grant access well, but rarely hide or segment the equipment itself.
- Fortinet reaches the same coverage as XoT with several products: firewalls, switches and a separate remote-access product.
- OT monitoring platforms are strongest at seeing and detecting. XoT instead mirrors the traffic (SPAN) to a partner's tool.
- XoT is the only one with full marks for both invisible equipment and micro-segmentation.

Based on public sources, mainly the vendors' own documentation, as of 25 November 2026. Where in doubt, we gave the higher score. Method, criteria and sources: xertified.com/resources/ot-access-vendors. Found an error? Write to info@xertified.com and we will correct it. Product names belong to their owners. None of the vendors has reviewed the comparison.
